

DhineshKumar Thirupathi

React Native, Next.js & Full-Stack .NET Developer

Chennai, India | dhinesh4668@outlook.com | +91 9150507538 | [linkedin.com/in/dhidroid-rndev](https://www.linkedin.com/in/dhidroid-rndev) | dhidroid.vercel.app

PROFESSIONAL SUMMARY

Results-driven Full-Stack & Mobile Developer with 1.5+ years delivering production-grade React Native, Next.js 15 and .NET 8 applications across ERP, HRTech, laboratory, and warehouse management domains. Skilled in offline-first architecture, workflow automation (n8n), CQRS/Clean Architecture, and cloud integrations (Firebase, Supabase, Azure, PostgreSQL, MSSQL). Proven track record architecting scalable MVPs, automating HR/recruitment operations, and shipping enterprise systems end-to-end within agile, cross-functional teams.

CORE SKILLS

Mobile: React Native (TypeScript), Offline-First Architecture, Push Notifications (FCM), Cross-Platform iOS/Android
Frontend: React.js, Next.js 15 (App Router), TypeScript, JavaScript (ES6+), Tailwind CSS, TanStack Query, Zustand, Recharts
Backend: .NET 8 (Clean Architecture, CQRS/MediatR), Node.js, Express.js, C#, REST & Web APIs, JWT/OAuth
Databases: MSSQL, PostgreSQL, MongoDB, SQLite, Multi-Tenant DB Design (RLS)
Automation & Cloud: n8n Workflow Automation, Docker, Firebase (Auth, FCM, CMS), Supabase, Microsoft Azure, Apache Tika, Payment Gateway Integration
E-commerce: Shopify (Liquid, Storefront API, Inventory Management), Sanity CMS
QA & DevOps: Jest, Detox, React Testing Library, Git, CI/CD Pipelines, Agile/Scrum
AI & Emerging Tech: LangChain, Ollama.cpp, LLM Pipeline Integration, openpyxl Reporting Automation

PROFESSIONAL EXPERIENCE

React Native & Full-Stack Developer | Natobotics Technology Pvt. Ltd. | Chennai, India

Dec 2024 – Present

- **Built a Lab Management System** (React, MSSQL, .NET 8 Clean Architecture) with role-based access control and clinical/sample data tracking modules.
- **Contributed to an enterprise Warehouse Management System** — developed the responsive React frontend, advanced search/filter modules, and integrated .NET Web API endpoints.
- **Automated recruitment & HR email workflows** using n8n and PostgreSQL, cutting manual processing time and improving shared job-order visibility across teams.
- **Built an HR Candidate Application portal** (Next.js 15, Supabase) enabling candidate intake, application tracking, and recruiter dashboards.
- **Architected and shipped 3+ production React Native & Next.js apps** (TypeScript), maintaining zero critical bugs in production.
- **Engineered an offline-first data sync layer** (SQLite + Supabase) and implemented Firebase Auth (OAuth, OTP) with FCM push notifications across multiple apps.
- **Delivered an internal Admin Panel mobile app** (95% crash-free sessions, multi-user roles) and a full Shopify e-commerce storefront for a jewelry brand — zero to live.

Full Stack Developer | Freelance / Independent Consultant | Remote

Oct 2022 – Nov 2024

- **Delivered 5+ end-to-end full-stack solutions** for small businesses (React, Node.js, MongoDB, Firebase), independently managing scope, design, dev and deployment.
- **Designed and developed the Kamal Coco Products landing page** (React, Vite, TypeScript, Framer Motion) with modern animated UI, improving digital presence and lead capture.
- **Built a cross-platform offline-first Notes & Reminder app** with FCM notifications — shipped on iOS and Android.
- **Developed a Habit Tracking app** with analytics dashboards and reminders (React Native), acquiring 100+ organic active users.
- **Integrated payment gateways and third-party auth services** for 3+ client projects, enabling live transaction processing from day one.

KEY PROJECTS

Stock Management application - Support

ReactJS · .NET Web API · MSSQL · Software Architecture

Developed and supported a **Stock Management Application** for managing **CII**, **Non-CII inventory**, including stock tracking, inventory operations, and data management.

n8n Email Automation Workflow

n8n · PostgreSQL · Apache Tika · Python/openpyxl

Docker-based automation stack that parses, routes, and reports recruitment emails/documents into a shared job-order tracking system.

Natobotics Lab Management System

React · MSSQL · .NET 8

Enterprise lab/sample tracking system with role-based access control and clinical workflow modules.

Banking Application

React · ASP.NET · MS SQL · Azure DevOps

Full-stack MVP for customer/loan flow management with real-time repayment status tracking, deployed on Azure.

Git Commit/PR Message Generator (AI)

React Native · LangChain · Supabase

AI-powered mobile tool auto-generating Git commit messages and PR descriptions via LLM pipelines.

HR Candidate Application Portal

Next.js 15 · Supabase

Candidate intake and application-tracking portal with recruiter dashboards and status workflows.

Warehouse Management System

React · .NET Web API

Enterprise inventory platform — built frontend UI, search/filtering, and .NET API integration.

Online Queue Token System (MVP)

React · Node.js · MS SQL · Azure

Full-stack MVP for customer-flow management with real-time token assignment and live status tracking.

Bus Ticket Booking / Vehicle Service App

React · Node.js · Express · MS SQL · Firebase

Booking MVP with seat selection, plus a vehicle service tracker with history and push reminders.

EDUCATION

B.Tech — Information Technology, RP Sarathi Institute of Technology

2020 – 2024 | CGPA: 8.07 / 10

LEADERSHIP

Secretary — Entrepreneurship Development Cell, RP Sarathi Institute of Technology: Organized 10+ tech workshops and industry events.
